

Step up for Safety

Help us bring hope and community to grieving families

Liz Webley's journey with Threads of Life began nearly two decades ago after the tragic loss of her husband, Dick Van Rooyen, who was killed while working on Highway 401 with his road construction crew. Later, when her second husband Fred Webley was diagnosed with a work-related lung disease, she continued to lean on the support and community she had found.

She became one of the organization's pioneering volunteers – first as a Volunteer Family Guide and then speaker. She felt called to mentor other widows in particular to help them process their grief. Liz reflects, “Over the years I was a guide for 28 widows. It meant so much to me because in helping them, I was also helping myself. For that, I’m forever grateful.”

The services that helped Liz, and in turn allowed Liz to help others, are free of charge to family members affected by workplace tragedies – and this is all thanks to Threads of Life’s amazing donors, volunteers, and participants in their signature annual fundraiser, Steps for Life-Walking for Families of Workplace Tragedy. Steps for Life features events across Canada, and registration is open now! You can walk on your own or team up with family, friends, and colleagues. Every step, and every dollar raised helps to create hope and prevent future tragedies. Learn more at www.stepsforlife.ca!

Management Training

CANB Moncton Northeast

Companies looking for Construction Management training for their staff should look at the courses offered by Moncton Northeast Construction Association. Click [HERE](#) for the link.

COR® Audit Review Timeline

Did you know that we recognize your efforts in maintaining COR® certification by promoting your company name on our website? Your certification anniversary date is shown and updated after every maintenance cycle.

This list can also be useful to those searching for or validating a company's COR® Letter of Good Standing. Using the NBCSA [list of COR® Participants](#) enables you to verify and confirm that their certification is valid, the COR® Participant List is updated in real-time.

Companies New to COR® or have Renewed COR®!

January COR®

- 3D Datacomm Inc
- Edgeline Construction Ltd.
- Harris Rebar Canada Placing Ltd
- Maxim Construction Inc.
- McPhee & Company Ltd.
- PoleCare International Inc
- OSCO Concrete NB Limited
- TH3 Construction LTD.

February COR®

- Eastco Construction Inc.
- Charters Construction Ltd.

Important update: Change to head protection standards coming

Recent legislative amendments have led to the adoption of nationally harmonized safety standards for Personal Protective Equipment (PPE) at WorkSafeNB. Notably, this includes an update to head protection requirements.

However, an oversight in the amended draft of General Regulations, 91-191, means it still specifies Type 1, Class E headwear as the correct type for project sites, despite the intended shift to Type 2, Class E headwear.

Until the regulatory correction occurs, both Type 1, Class E, and Type 2, Class E headwear will be accepted on project sites in New Brunswick. However, employers and employees are strongly advised to choose Type 2, Class E headwear, as it will be mandatory on project sites in the future and provides an added level of protection.

Here are brief descriptions of the two headwear types according to CSA standard Z94.1-15:

Type 1, Class E: Protects against crown impacts and penetration. It is non-conducting and designed to pass the dielectric strength test for Class E headwear.

Type 2, Class E: Protects against crown and lateral impacts. It is non-conducting and meets the dielectric strength test.

View CSA standard Z94.1-15 by [creating an account on the Canadian Standards Association website.](#)
